

Butte Creek Mill—the Last Water-Powered Grist Mill West of the Mississippi

Photos by David Hatch, Dale Waldron

On Saturday March 26, 2022, Henry's Lady Club members joined the State of Jefferson Antique Car Club (SOJACC) and the Model T Club on a tour to the historic [Butte Creek Mill](#) and lunch at Mac's Diner in Shady Cove. Butte Creek Mill is an iconic structure that was built in 1872 in Eagle Point, Oregon. It is on the National Register of Historic Places as the last water-powered grist mill, still commercially operating, west of the Mississippi. We enjoyed a guided tour through the old Mill buildings. The finale was a stop in the gift shop to purchase locally milled flour, baking products, and merchandise.
